

Valero Energy can earn more \$\$ money producing TBK BioDiesel with 100% Renewable Biofuels.

Plant Oil + Ethyl Acetate from Zeachem produces TBK Biodiesel

Valero Energy Corp (NYSE: VLO), the largest petroleum refiner in the US, is among ZeaChem's investors. Zeachem Produces Ethyl Acetate C2 Chain Product.

Bill Day (bill.day@valero.com) a spokesman for Valero Energy, says the company was attracted to NewEnergy because the Jatropha Curcuas plant holds a lot of promise in the biofuel industry as it is considered to be a highly renewable resource.

James Garton (james@missionnewenergy.com) president of Mission USA and head of corporate finance for Mission NewEnergy Limited, says it has signed a five-year supply agreement with San Antonio based Valero Energy Corp.

Valero has agreed to buy up to 60 million gallons of biodiesel per year from Mission NewEnergy, which it will blend with its regular diesel in order to satisfy new federal requirements.
